

STEAM PEELERS

FOOD MACHINERY AUSTRALASIA

Product Description

Our Steam Peelers are a result of the development of new technologies and control equipment in the method of steam peeling vegetables within the vegetable processing industry. These Steam Peelers offer: Longitudinal angled steam vessel for better product steam mixing, improving peeling quality; Compact and fast loading batch weighting system; Better steam distribution through steam defuser; Specially designed condensation screen in steam vessel; Greater steam efficiency; Compact design, requiring less floor space; Computerised control system incorporating stainless steel control panel and PLC; Better condenser design; Supplied with an expansion chamber for the condensing of exhaust steam from the vessel; The steam vessel and expansion chamber are fabricated from carbon steel; The housing and frame are stainless steel construction; Stainless steel steam vessel is available as an optional extra.

COMPACT DESIGN

IMPROVED STEAM EFFICIENCY

FAST WEIGHING SYSTEM

We are here to help

Food Machinery Australasia has specialized TurnKey project solutions available, from concept to commissioning, layouts to detailed engineering, incorporating a variety of technical and non technical services and processes. Food Machinery Australasia offers the service that will help you get exactly what you want without stretching your limits.

Our equipment has proven its worth in the demanding markets by demonstrating it has the financial ability to pay for itself over 10 years.
